As we discussed last night, we received another citizen call on this mine site yesterday, this one from Karen Cunningham, nearby resident.

Her concerns are:

- issues of slope stability
- breaking of the 1000' buffer zone imposed by the county
- non-response of one month to Greg Baptist at the county (ph 468- 2000)
- that they are no longer working the site (as of last fall) and reclamation has not begun
- that the gate to the site is open

I told her that we would look at the site and respond to her. Her phone # is 943-9137.
